Amoos plays a key role in the lives of many of us.

We clean, absorb and protect.

We are there in both your personal and professional lives,
often in a close skin-paper relationship.

We are soft and effective. We are also demanding.

We innovate, creating new and **better processes to offer the best possible quality.**

VIRGIN FIBRE

Products in **pure virgin fibre**, employing a combination of short fibres to ensure greater softness and long fibre for greater strength. Virgin fibre provides products with a high standard of excellence and therefore greater purity.

INTEGRATED PRODUCTION

Europe's most efficient **tissue paper** manufacturing unit, linked by a *pipeline* to the pulp producer, guarantees **high quality and consistency**, by way of a lean operation, in terms of logistics and energy, and brings **environmental advantages**.

The pipeline from the pulp plant provides advantages at various levels:

Environmental

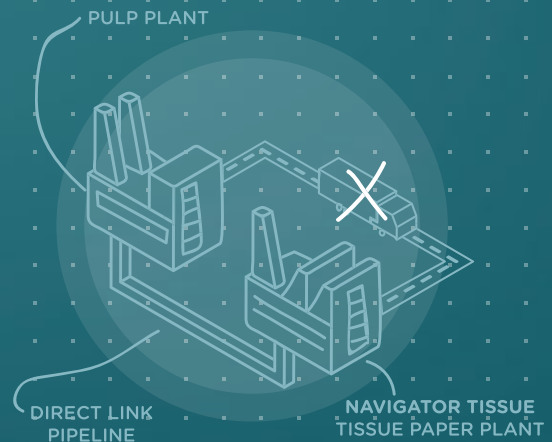

Lower energy consumption and CO2 emissions, as there is no trucking of the pulp.

Quality

Guaranteed control and consistency of raw material quality.

Resource Efficiency

Elimination of the drying and rehydrating of the pulp, plus the elimination of trucking.

WE TAKE CARE OF YOU AND THE PLANET

The raw material employed by The Navigator Company comes from responsibly managed forests. In addition, our manufacturing process makes efficient use of natural resources. This is shown by our FSC™ and Ecolabel certificates, which call for the highest performance standards.

100%

of timber comes from controlled and certified sources.

88%

of waste generated is recovered.

90%

of materials used are renewable

77%

of the energy employed to produce pulp and paper is renewable energy

6M

tons of CO₂ are captured by our forests.

2035

Committed to achieve Carbon Neutrality by 2035.

AQUACTIVE™
BY THE NAVIGATOR COMPANY

TECHNOLOGY

AQUACTIVE™

- Multipurpose -

Using the innovative technology Aquactive™, soap is applied to the paper and activated when it comes into contact with water. In one simple step the paper produces foam possessing incredible cleaning power.

Developed to simplify daily chores, this 2 in 1 Multipurpose paper ensures a swift, deep and more hygienic clean: **STRONG AND WITH THE CLEANING POWER OF SOAP.**

From raw material to manufacture, our paper follows a totally green and sustainable path, coming from responsibly managed forests (FSC™).

CALORIE CONTROL™

- Kitchen -

Now it is easier to prepare healthier meals for family and friends! Amoos Calorie Control™ is your new ally that absorbs and controls calories!

The new, three-ply, **Calorie Control™ technology** ensures the number of calories in food is reduced by up to 25%*, meaning you can serve healthier meals, that have less oil and, therefore, less calories!

The air pockets formed by the technology increase its ability to absorb fats, while giving it the strength it needs to stay in one piece when in use.

COMPACT LEMON

- Kitchen Roll -

More metres of strength and absorption to use in the daily fight against dirt.

This is a practical kitchen format, especially in terms of storage, since 2 Amoos Compact rolls are equal to 4 standard kitchen rolls on the market! The rolls also release a pleasing lemon scent, that is incorporated in the tube, so you can smell subtle notes of fresh fragrance in your kitchen. It is a more sustainable format, since its compact nature means more rolls can be carried per truck, thus reducing CO₂ emissions.

HAND TOWELS

- Professional Use -

Maximum absorption and softness, designed specifically to guarantee speedy and effective hand drying.

The virgin fibre means they are whiter, softer and more absorbent: three or four sheets are enough for effective drying. In addition to being effective, they are more hygienic than hot air dryers, and prevent bacteria from propagating in the air.

Our paper comes from renewable resources, and is made of certified and dermatologically tested 100% cellulose. From raw material to manufacture, our paper follows a totally green and sustainable path, coming from responsibly managed forests (FSC™).

WIPER ROLLS

- Professional Use -

In order to clean all surfaces properly, and hands as well, it is important to have a Wiper Rolls on hand: it will swiftly absorb any spillage on a counter with breaking down and the center feed dispenser gives rise to more efficient usage. This roll is the ideal solution for day-to-day cleaning of multiple rooms, thanks to its superior length.

The blue roll was designed especially to be in contact with food: **its colour means any trace of paper can easily be identified.**

EXTRA
DURABLE

ABSORBENT

To ensure that a range of surfaces are always clean, we can supply professionals with industrial paper rolls. Since it is disposable it is more hygienic than a conventional cloth. **With a single extra long roll you can clean all types of dirt swiftly and efficiently, thanks to the paper's power of absorption and strength.**

The industrial roll, that also comes in blue, means that no scraps of paper are left on the equipment. **A single roll can perform a range of jobs.**
